

CONSULTING & MANAGED SERVICES

Expert hands on ArtistryBase

ArtistryBase is a creative platform you can run yourself, but you do not have to do it alone. We help you adopt and get more from ArtistryBase, and we deliver done-for-you creative outcomes powered by it: studio setup, integrations, migrations, workflow operations, governance, and enablement.

GROUNDED IN THE PRODUCT

RBAC & AUDIT THROUGHOUT

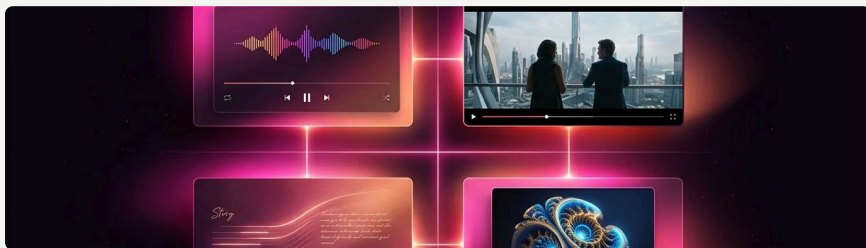

HEADLESS & API-FIRST

01 What we do

Comprehensive services across the ArtistryBase creative lifecycle, every one grounded in a real product capability. Engage one, or combine several into a program.

ArtistryBase is one platform for every kind of creative work: audio, video, stories, and art. The services fall into two tracks. One improves the ArtistryBase you run. The other delivers outcomes for you, using the product.

TRACK 01

Improve your ArtistryBase

Consulting, implementation, migration, security, and training so your team gets the full value of the platform, faster, and with governance from day one.

Creative Platform Consulting & Architecture · Migration & Onboarding from Existing Tools · Workflow & Review Enablement · Creative Intelligence & AI Enablement · Security, RBAC & Governance · Training & Team Enablement

TRACK 02

Powered by ArtistryBase

Done-for-you outcomes we deliver using the product (studio setup, integrations, and managed creative operations) so you can focus on the work.

Implementation & Studio Setup · Integrations & Extensibility · Managed Creative Operations

02 · TRACK ONE

Improve your ArtistryBase

Consulting, implementation, migration, security, and training so your team gets the full value of the platform, faster, and with governance from day one.

WE LEAVE YOUR TEAM ABLE TO RUN IT WITHOUT US

Documentation, playbooks and hands-on enablement

Every engagement ships documentation, golden-path playbooks, and hands-on enablement, so your creators, producers, and engineers understand the platform, not just the dashboard.

- 2.1 Creative Platform Consulting & Architecture
- 2.2 Migration & Onboarding from Existing Tools
- 2.3 Workflow & Review Enablement
- 2.4 Creative Intelligence & AI Enablement
- 2.5 Security, RBAC & Governance
- 2.6 Training & Team Enablement

02 Improve your ArtistryBase: design, move and flow

2.1 · CONSULTING

Creative Platform Consulting & Architecture

We help you design the right setup on ArtistryBase (library structure, collections, review and approval flows, and studio topology) so a solo creator or a multi-team studio is modelled correctly from day one.

- Discovery of your current creative tooling across audio, video, stories, and art
- Library, collection, and tagging model for every medium you work in
- Review, approval, and release-workflow design tuned to how you ship
- Solo-creator vs. multi-team studio topology recommendations
- Workspace, RBAC, and multi-tenancy design grounded in the platform

2.2 · MIGRATION

Migration & Onboarding from Existing Tools

Moving off scattered drives, a DAM that only handles one medium, and review tools that do not talk to each other? We migrate your creative work into ArtistryBase with minimal disruption.

- Inventory of current storage, DAM, review, and portfolio systems
- Asset and project migration with mapping and validation
- Version-history and metadata preservation where feasible
- Parallel-run validation and a reversible cutover plan
- Team handover with runbooks for the new creative workflow

2.3 · WORKFLOW

Workflow & Review Enablement

We turn drafts into a smooth daily production flow (review, revise, approve, release) with in-context feedback, roles, and the version history that keeps everyone aligned, all configured to how you actually work.

- Review and approval workflow configuration tuned to your productions
- Role, permission, and sign-off setup for creative teams
- In-context feedback configuration for audio, video, stories, and art
- Version-history and draft conventions for clean iteration
- Publishing and release flows wired to your audiences

02 Improve your ArtistryBase: discover, govern and enable

2.4 · AI ENABLEMENT

Creative Intelligence & AI Enablement

We help you put the platform's AI to work (auto-tagging, semantic search, and cross-medium discovery) as a governed roadmap, so finding and surfacing work gets easier without overstating what exists today.

- Auto-tagging and metadata enrichment setup across mediums
- Semantic-search and discovery configuration for your library
- Recommendation and audience-matching enablement as it ships
- Insight setup for how work is discovered and followed
- Honest current-vs-roadmap framing so expectations stay accurate

2.5 · GOVERNANCE

Security, RBAC & Governance

We configure ArtistryBase to your compliance bar (least-privilege roles across creators, collaborators, reviewers, and admins, audited actions, and clear rights and licensing) inherited from the Burdenoff platform rather than re-invented.

- Workspace RBAC role design and least-privilege access reviews
- Multi-role identity setup with every action scoped and attributable
- Audit-log review, retention configuration, and evidence workflows
- Ownership, attribution, and licensing-policy review
- Data-protection and subprocessor alignment for your jurisdiction

2.6 · TRAINING

Training & Team Enablement

We get your creators, producers, and engineers genuinely productive, not just logged in. Role-based sessions and golden-path playbooks so a new collaborator runs a review, and a new developer drives the API, in hours.

- Hands-on workshops for creators, producers, and platform teams
- Golden-path playbooks for libraries, reviews, and releases
- API, CLI, MCP, and SDK enablement for engineering teams
- Admin and oversight training for studio operators
- Onboarding checklists and curated learning paths

03 · TRACK TWO

Powered by ArtistryBase

Done-for-you outcomes we deliver using the product (studio setup, integrations, and managed creative operations) so you can focus on the work.

WE SET IT UP WITH YOU

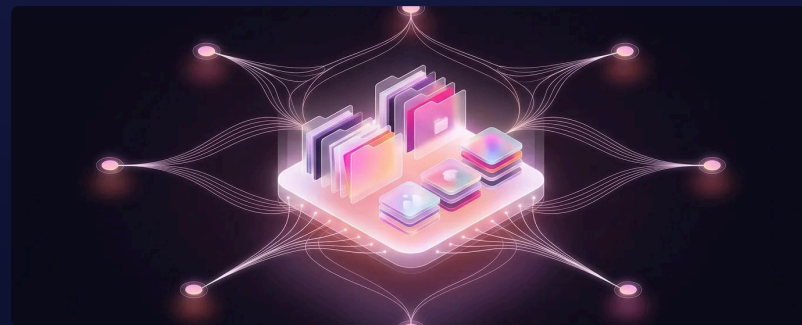

Studios, integrations, and creative workflows

Our specialists work alongside your team to stand up your creative workspace on ArtistryBase. Libraries, projects, review and approval flows, and publishing are wired together and driven via the API, validated before a single real production runs through it.

3.1 Implementation & Studio Setup

3.2 Integrations & Extensibility

3.3 Managed Creative Operations

03 Powered by ArtistryBase

3.1 · SETUP

Implementation & Studio Setup

Our specialists stand up your ArtistryBase-powered creative workspace end to end (libraries, projects, roles, and publishing wired together) so you start working, not configuring.

- Library, project, and workspace structure configured for your output
- Asset import and organization across audio, video, stories, and art
- Review, approval, and release pipeline configuration
- Team, role, and permission setup with attribution from day one
- A validated launch so the first real project works on day one

3.2 · INTEGRATIONS

Integrations & Extensibility

ArtistryBase is API-first. We connect it to the rest of your stack (creative tools, storage, identity, notifications, and analytics) through the documented API, webhooks, and platform SSO, so work and metadata flow instead of being re-keyed.

- Connecting your existing creative and editing tools through the API
- Storage, identity, and SSO integration on the platform foundation
- Notification, messaging, and analytics configuration
- Webhooks and event wiring for downstream systems
- Guidance for connecting your own sites and apps through the API

3.3 · OPERATIONS

Managed Creative Operations

Prefer to focus on making the work? We operate your ArtistryBase workspace for you, keeping libraries organized, reviews moving, publishing on schedule, and acting on what the data shows.

- Library and project organization upkeep across mediums
- Review-queue and approval-flow monitoring and nudges
- Publishing, scheduling, and release coordination
- Scheduled maintenance, backups, and incident response
- Usage and discovery reporting back to your team

04 Set it up with us, or hand us the workspace

WE SET IT UP WITH YOU

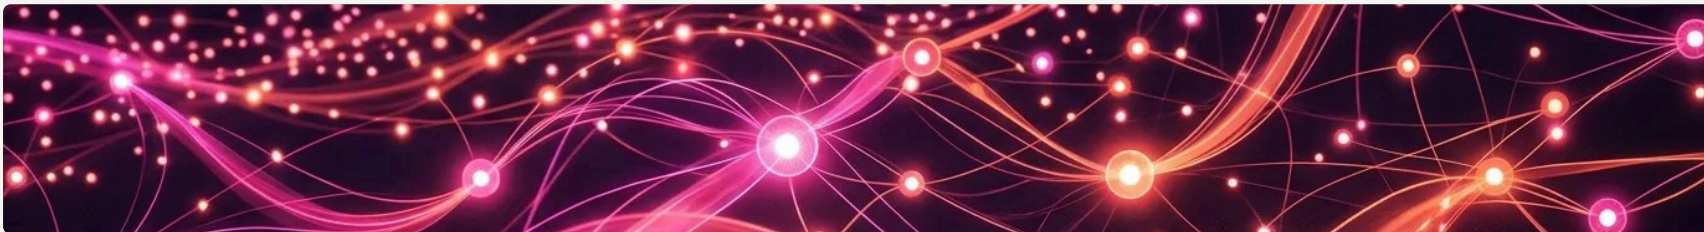

Libraries, projects, review and approval flows, and publishing are wired together and driven via the API, validated before a single real production runs through it.

- Library, project, and review flows configured to how your team works
- Your existing creative tools and identity connected through the API and SSO
- A validated launch so the first real project works on day one

OR HAND US THE WORKSPACE

When you would rather focus on the work itself, we run the workspace for you, with usage and discovery reporting back to your team.

- Library and review-queue health monitoring across mediums
- Organization, publishing, and release-coordination upkeep
- RBAC-scoped, fully audited access, never shared secrets

05 How we engage

A clear path from intent to impact. The same loop whether it is a one-week studio stand-up or a multi-quarter creative program: scoped, reviewable, and audited at every step.

01

Discover

We map your creative work, teams, workflows, and goals, and agree on what "done" looks like before any work starts.

02

Plan

A scoped, reviewable plan: library and project model, review and approval flows, integrations, RBAC, and rollout sequence.

03

Build

We set up libraries, import assets, configure review and publishing flows, and validate everything, shipping in increments you can see.

04

Operate

We hand over with docs and enablement, or stay on to run the workspace: monitored, audited, and reporting from the first day.

ENGAGEMENT MODEL

Engage one service, or combine several into a program.

PRICING

Contact us. Tell us about your work and goals and we will scope the right mix.

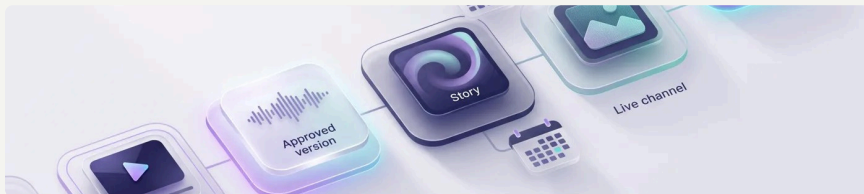

SUPPORT

From standard support to priority response, with incident response, upgrade guidance, and a named point of contact for enterprise engagements. Tiers are scoped to your plan.

06 We leave your team able to run it without us

Every engagement ships documentation, golden-path playbooks, and hands-on enablement. Whether you keep us on to operate the workspace or take the keys yourself, your creators, producers, and engineers understand the platform, not just the dashboard.

- **Role-based workshops for creators, producers, and engineering teams**
- **API, CLI, MCP, and SDK enablement so teams extend it themselves**
- **Onboarding checklists and curated learning paths**

HOW TO START

Let's scope what you need

Tell us about your creative work, teams, and goals. We will recommend the right mix of consulting, implementation, operations, and enablement, and a plan to get there.
