Description

We are looking for an experienced Senior Backend Engineer to join our engineering team. The ideal candidate will have strong expertise in building scalable backend services, a passion for clean code, and experience with distributed systems. You will be responsible for designing and developing high-performance services, collaborating with cross-functional teams, and mentoring junior engineers.

Requirements

5+ years of experience in backend software development

Proficiency in Python, Go, or Java

Experience with relational and NoSQL databases

Understanding of cloud platforms (AWS, GCP, or Azure)

Strong problem-solving and communication skills

Benefits

Remote Work

Competitive Salary

Health Insurance

Unlimited PTO

[Features](#)[How it works](#)[Why](#)[Sign In](#)[Join the Waitlist](#)

Pre-launch · 2026

The unified people platform for project-driven teams

Seamlessly manage your entire workforce lifecycle, from hiring and onboarding to resourcing and billing, all in one integrated system.

[Join the Waitlist](#)[Sign In](#)

One workforce data model

Unify all people data into a single, trusted source of truth for better decision-making.

Hiring to onboarding to resourcing

Streamline the entire lifecycle, ensuring talent is quickly sourced, integrated, and deployed.

RBAC, audit & billing built in

Secure access, track all actions, and automate invoicing with integrated compliance features.

Proposed staffing - Helio Rollout, Backend role

Awaiting review

Inputs read

Project: Helio Rollout

Role needs: Node.js, PostgreSQL, GraphQL

Window: 04 Aug - 26 Sep 2026

Candidates considered: 34

Proposal

Match bar

RA	Rahul Nair 24 h/week free		88%
MR	Rahul Nair 24 h/week free		88%
JS	Rahul Nair 24 h/week free		75%

Rationale

Proposed staffing - Helio rollout, backend role, match of availability, a shorter sentence for rate, node.js to crastib sentences.

AI-generated rationale - verify before applying.

Model · gateway default

Trigger · manual

Latency · 2.4 s

Cost · Rs 3.10
