

PROFESSIONAL SERVICES

Expert hands on your supply chain

MoveTheWheels is a platform you can run yourself, but you do not have to do it alone. Implementation, integrations, training, and managed logistics operations.

MANAGED OPERATIONS

01 How the services fit the platform

We help you adopt and get more from MoveTheWheels, and we deliver done-for-you outcomes powered by it: implementation, integrations, training, and managed logistics operations.

Professional services across the MoveTheWheels lifecycle, every one grounded in a real platform capability. Engage one, or combine several into a program.

GROUNDED IN THE PLATFORM

ROLE-BASED ACCESS & AUDIT

SANDBOX-VALIDATED ROLLOUTS

TRACK ONE · 02

Adopt MoveTheWheels

Consulting, implementation, migration, integrations, security, and training so your team gets the full value of the platform, faster, and with governance from day one.

Consulting · Implementation · Migration · Integrations · Training · Team enablement · Security · Support

TRACK TWO · 03

Powered by MoveTheWheels

Done-for-you outcomes we deliver using the platform (managed control-tower operations, carrier coordination, and freight settlement) so you can focus on your business.

Managed Logistics Operations

02 · TRACK ONE

Adopt MoveTheWheels

Consulting, implementation, migration, integrations, security, and training so your team gets the full value of the platform, faster, and with governance from day one.

WE IMPLEMENT AND INTEGRATE IT WITH YOU

Our consultants and engineers work alongside your team to stand MoveTheWheels up the right way: modules configured to your lanes, carriers onboarded, and your existing TMS, WMS, and ERP connected. Everything is validated in a sandbox before it touches live freight.

- Network design and a phased, reviewable rollout plan
- Module configuration, rate logic, and document flows
- TMS / WMS / ERP and carrier API integrations

2.1 **Logistics Consulting & Network Design**

2.2 **Implementation & Configuration**

2.3 **Migration & Onboarding from Existing Tooling**

2.4 **Integrations & Carrier Onboarding**

2.5 **Training & Enablement**

2.6 **Team Enablement & Platform Adoption**

2.7 **Security, Compliance & Governance**

2.8 **Support & SLA Plans**

02 Adopt MoveTheWheels: design and stand it up

2.1 · CONSULTING

Logistics Consulting & Network Design

We map your shipments, lanes, fleets, and warehouses, then design how MoveTheWheels should run them before any rollout starts. You get a target operating model, not guesswork.

- Current-state assessment of TMS, WMS, ERP, and manual processes
- Lane, mode, and network analysis (road, air, ocean)
- Target topology: shippers, carriers, warehouses, and control tower
- Phased rollout roadmap with clear, agreed success criteria
- Configuration choices for each module, with a realistic timeline

2.2 · IMPLEMENTATION

Implementation & Configuration

Our team stands up your MoveTheWheels workspace end to end (modules, roles, lanes, rate logic, and document flows) configured to how your operation actually works.

- Workspace, org, and multi-role identity setup
- Transportation, warehouse, and order modules configured to your flows
- Rate cards, service levels, and SLA policies modelled
- Document templates: bookings, BOLs, ePODs, and customs paperwork
- Sandbox validation before anything goes live

2.3 · MIGRATION

Migration & Onboarding from Existing Tooling

Moving off spreadsheets, a legacy TMS, or a tangle of carrier portals? We migrate your master data and live freight onto MoveTheWheels with minimal disruption.

- Inventory of carriers, lanes, locations, assets, and rate agreements
- Master-data cleansing, mapping, and bulk import
- Parallel-run validation so nothing falls through the cracks
- Cutover plan with rollback safeguards
- Historical shipment and document archival

02 Adopt MoveTheWheels: connect it and enable your people

2.4 · INTEGRATIONS

Integrations & Carrier Onboarding

We help you connect MoveTheWheels to the systems and partners you already run through its API and webhooks, so freight, inventory, and order data flow across your stack instead of living in silos.

- Connecting your TMS, WMS, ERP, and finance systems through the API
- Carrier and 3PL API / EDI onboarding and rate ingestion
- Webhooks and event flows for status, ETA, and ePOD updates
- Telematics and GPS device data wiring for live tracking
- Role-based access and audit trails across teams and partners

2.5 · TRAINING

Training & Enablement

We get your dispatchers, drivers, warehouse leads, and operations teams genuinely productive, not just logged in, with role-based training and golden-path playbooks.

- Hands-on workshops for shippers, carriers, warehouse, and ops roles
- Driver-app and mobile PWA onboarding sessions
- Golden-path playbooks set up for your lanes and processes
- Admin and control-tower operator certification
- Onboarding checklists and curated learning paths

2.6 · ADOPTION

Team Enablement & Platform Adoption

For teams scaling MoveTheWheels across regions or business units, we embed alongside yours to drive adoption, standardize processes, and keep the rollout on track.

- Adoption planning and change-management support
- Standardized process templates across sites and regions
- Center-of-excellence setup and internal champion enablement
- Adoption metrics and rollout health reviews
- Quarterly roadmap and optimization reviews

02 Adopt MoveTheWheels: govern and support it

2.7 · SECURITY

Security, Compliance & Governance

We configure MoveTheWheels to your compliance bar: least-privilege roles, audited actions, document controls, and data-handling aligned to your supply-chain governance.

- Role and permission design with least-privilege reviews
- Audit-trail, retention, and evidence-workflow configuration
- Document-control and access policies for sensitive paperwork
- Data-residency and partner-access governance
- Security and access reviews as the rollout scales

2.8 · SUPPORT

Support & SLA Plans

Logistics never sleeps. We back your operation with tiered support and clear response commitments so a blocker never becomes a stalled shipment.

- Tiered support plans with defined response targets
- Priority incident handling for operational blockers
- A named contact and escalation path for enterprise plans
- Health checks and proactive configuration reviews
- Release and change guidance as the platform evolves

PRICING

Scoped to your operation

Every engagement is scoped to your lanes, fleets, and goals. Tell us what you need and we will recommend the right mix of services and a plan to get there.

03 · TRACK TWO

Powered by MoveTheWheels

Done-for-you outcomes we deliver using the platform (managed control-tower operations, carrier coordination, and freight settlement) so you can focus on your business.

OR HAND US THE CONTROL TOWER

When you would rather focus on your business, we run logistics operations for you on MoveTheWheels. We monitor every shipment, work the exceptions, coordinate carriers, and reconcile freight spend, with clear operational reporting back to your team.

3.1 · MANAGED OPERATIONS

Managed Logistics Operations

Prefer to focus on your business? We operate the control tower for you on MoveTheWheels: monitoring shipments, working exceptions, and keeping the network healthy.

- Control-tower monitoring across shippers, carriers, and warehouses
- Exception management: delays, dwell, and at-risk SLAs
- Carrier coordination and dispatch oversight
- Freight-spend reconciliation and settlement support
- Operational reporting surfaced back to your team

04 How we engage: a clear path from intent to impact

The same loop whether it is a focused setup or a multi-quarter program: scoped, reviewable, and validated at every step.

01

Discover

We map your lanes, fleets, warehouses, systems, and goals, and agree on what "done" looks like before any work starts.

02

Plan

A scoped, reviewable plan: target operating model, module configuration, integrations, and a phased rollout sequence.

03

Implement

We configure modules, onboard carriers, wire integrations, and validate everything in a sandbox, shipping in increments you can see.

04

Operate

We hand over with training and playbooks, or stay on to run your control tower: monitored, audited, and supported from day one.

ENGAGE ONE

Pick a single focused service, such as network design, a migration, or carrier integrations.

OR COMBINE SEVERAL INTO A PROGRAM

Consulting, implementation, operations, and enablement, sequenced into one plan.

05 We leave your team able to run it without us

Every engagement ships documentation, golden-path playbooks, and hands-on training. Whether you keep us on to run the control tower or take the keys yourself, your dispatchers, drivers, and operations teams understand the platform, not just the dashboard.

- **Role-based workshops for shippers, carriers, warehouse, and ops teams**
- **Driver-app and control-tower operator enablement**
- **Onboarding checklists and curated learning paths**

TWO WAYS TO FINISH

Take the keys, or keep us on
