

EXPERT HANDS ON TECHNOSPAM

TechnoSpam Services

Consulting, course production, migrations, cohort operations, governance and enablement — to help you adopt and get more from the TechnoSpam skill & technology platform, or to deliver learning outcomes for you on it.

GROUNDED IN THE PRODUCT

RBAC & AUDIT THROUGHOUT

API-FIRST & EXTENSIBLE

Every service on these pages is grounded in a real product capability. Pricing is not published for services — contact the team to scope an engagement.

[TECHNOSPAM.COM/SERVICES](https://technospam.com/services)

01 How the services relate to the product

TechnoSpam is a skill & technology platform you can run yourself. But you do not have to do it alone. The services cover the TechnoSpam learning lifecycle — every one grounded in a real product capability. Engage one, or combine several into a program.

TRACK 1

Improve your TechnoSpam

Consulting, migration, security, and training so your team gets the full value of the platform — faster, and with governance from day one.

- 01 Learning Strategy & Skills Consulting
- 02 Migration & Onboarding from Existing Tooling
- 03 Cohort & Program Enablement
- 04 Learning Intelligence & AI Enablement
- 05 Security, RBAC & Governance
- 06 Train-the-Trainer & Admin Enablement

TRACK 2

Powered by TechnoSpam

Done-for-you outcomes we deliver using the product — course production, integration setup, and managed learning operations — so you can focus on your people.

- 07 Curriculum & Course Production
- 08 Integrations & API Setup
- 09 Managed Learning Operations

02 Improve your TechnoSpam

IMPROVE YOUR TECHNOSPAM

01 Learning Strategy & Skills Consulting

We help you design the right learning program on TechnoSpam — skill frameworks, role-based learning paths, cohort structure, and certification model — so an individual academy or an org-wide upskilling program is shaped correctly from day one.

DELIVERABLES

- Discovery of your current L&D tooling, skills matrix, and goals
- Role-based competency mapping and learning-path design
- Cohort, mentorship, and assessment model recommendations
- Individual-academy vs. org-wide program topology guidance
- Workspace, RBAC, and data-isolation design grounded in the platform

IMPROVE YOUR TECHNOSPAM

02 Migration & Onboarding from Existing Tooling

Moving off a tangle of an LMS, scattered slide decks, a separate quiz tool, and a spreadsheet of learner records? We migrate your content, courses, and learners into TechnoSpam with minimal disruption.

DELIVERABLES

- Inventory of current LMS, content, assessment, and learner systems
- Course and content migration with mapping and validation
- Historical enrolment, progress, and completion data import where feasible
- Parallel-run validation and a reversible cutover plan
- Team handover with runbooks for the new learning model

02 Improve your TechnoSpam

IMPROVE YOUR TECHNOSPAM

03 Cohort & Program Enablement

We turn assigned paths into a running program — cohorts, mentorship, hackathons, and the progress tracking that keeps people moving — all configured to how your teams actually learn.

DELIVERABLES

- Cohort and learning-path configuration tuned to your timelines
- Mentorship matching and session-scheduling setup
- Hackathon and challenge setup for momentum and engagement
- Progress, streak, and leaderboard configuration
- Completion and reporting dashboards for L&D and managers

IMPROVE YOUR TECHNOSPAM

04 Learning Intelligence & AI Enablement

We help you put the platform's data to work — skill-gap analysis, personalised recommendations, and adaptive study plans — as a governed roadmap, so decisions move from gut-feel to data-backed without overstating what exists today.

DELIVERABLES

- Analytics setup for enrolment, completion, and skill coverage
- Skill-gap analysis scoped against your competency framework
- Personalised recommendation and adaptive-path enablement as it ships
- Study-plan and nudge design for at-risk learners
- Honest current-vs-roadmap framing so expectations stay accurate

02 Improve your TechnoSpam

IMPROVE YOUR TECHNOSPAM

05 Security, RBAC & Governance

We configure TechnoSpam to meet your compliance bar — least-privilege roles across learner, mentor, team lead, and admin, audited actions, and governed data flows — built on the platform rather than re-invented.

DELIVERABLES

- Workspace RBAC role design and least-privilege access reviews
- Multi-role identity setup with every action scoped and attributable
- Audit-log review, retention configuration, and evidence workflows
- Learner-data governance and privacy alignment for your jurisdiction
- Data-protection and subprocessor alignment for your org

IMPROVE YOUR TECHNOSPAM

06 Train-the-Trainer & Admin Enablement

We get your instructors, mentors, and admins genuinely productive — not just logged in. Role-based sessions and golden-path playbooks so a new instructor builds a course, and a new admin runs the academy, in hours.

DELIVERABLES

- Hands-on workshops for instructors, mentors, and admins
- Golden-path playbooks for authoring, cohorts, and reporting
- API, CLI, MCP, and SDK enablement for engineering teams
- Admin and oversight training for academy operators
- Onboarding checklists and curated learning paths

03 Powered by TechnoSpam

POWERED BY TECHNOSPAM

07 Curriculum & Course Production

Our learning engineers and instructional designers build your courses, lessons, and hands-on labs on TechnoSpam — runnable in-browser exercises, problem sets, and projects — so you launch with real, learn-by-doing content, not a pile of slides.

DELIVERABLES

- Course outlines, lessons, and learning objectives written with your SMEs
- In-browser, runnable coding labs and graded exercises
- Problem sets and guided projects tied to real outcomes
- Assessments and verifiable certificate tracks
- Accessibility and quality review before anything ships

POWERED BY TECHNOSPAM

08 Integrations & API Setup

TechnoSpam is API-first. We configure its built-in connections — SSO/identity, notifications, and webhooks — and guide your developers as they connect your own HRIS, BI, and skills platforms through the documented API, so learning data flows instead of living in a silo. If a connection you need is not built in yet, tell us what is missing.

DELIVERABLES

- SSO / identity configuration so learners sign in with your IdP
- HRIS and skills-platform sync for roles and competencies through the documented API
- Notification and reminder channels configured for your comms tools
- Webhook and event subscriptions set up for your downstream systems
- API and SDK guidance so your team connects its own portals, dashboards, and partner apps

Powered by TechnoSpam

POWERED BY TECHNOSPAM

09 Managed Learning Operations

Prefer to focus on your people, not the platform? We operate your TechnoSpam academy for you — keeping content current, running cohorts and mentorship, monitoring engagement, and acting on what the data shows.

DELIVERABLES

- Cohort and program operation across your organisation
- Content, course, and assessment upkeep
- Mentorship coordination and hackathon facilitation
- Scheduled maintenance, backups, and incident response
- Engagement, completion, and skills reporting back to your team

POWERED BY TECHNOSPAM

We set it up with you — courses, labs, and connections

Our learning engineers and instructional designers work alongside your subject-matter experts to stand up your academy on the TechnoSpam skill & technology platform. Courses, runnable in-browser labs, assessments, and learning paths are produced, and sign-in and notifications are configured for your identity provider and tooling — quality-reviewed before a single learner enrolls.

INCLUDES

- Course production with runnable, learn-by-doing labs and projects
- SSO, HRIS, assessment, and certificate configuration
- Quality- and accessibility-reviewed content before launch

Run it for you, or leave you running it

POWERED BY TECHNOSPAM

Or hand us the program — managed learning operations

When you would rather focus on your people, we run the academy for you. We keep content current, run cohorts and mentorship, facilitate hackathons, monitor engagement, and act on what the data shows — with engagement, completion, and skills reporting back to your team.

- Cohort, mentorship, and hackathon operation across the org
- Content, course, and assessment upkeep
- RBAC-scoped, fully audited learner data — never shared secrets

IMPROVE YOUR TECHNOSPAM

We leave your team able to run it without us

Every engagement ships documentation, golden-path playbooks, and hands-on enablement. Whether you keep us on to operate the academy or take the keys yourself, your instructors, mentors, and admins understand the platform — not just the dashboard.

- Role-based workshops for instructors, mentors, and engineering teams
- API, CLI, MCP, and SDK enablement so teams extend it themselves
- Onboarding checklists and curated learning paths

05 How we engage: a clear path from intent to impact

The same loop whether it is a one-week course build or a multi-quarter org-wide upskilling program — scoped, reviewable, and audited at every step.

01

Discover

We map your skills goals, existing content, learners, and tooling — and agree on what “done” looks like before any work starts.

02

Plan

A scoped, reviewable plan: skill framework, learning paths, content, integrations, RBAC, and rollout sequence — with checkpoints where it matters.

03

Build

We produce courses and labs, configure cohorts, mentorship, and the built-in integrations, and validate everything — shipping in increments you can see.

04

Operate

We hand over with docs and enablement, or stay on to run the academy — monitored, audited, and reporting from the first day.

SUPPORT & SLAS

From standard support to priority response with defined SLAs, we keep your academy running — incident response, upgrade guidance, and a named point of contact for enterprise engagements. Tiers are scoped to your plan and operational needs.

HOW TO START

Engage one service, or combine several into a program. Tell us about your skills goals, content, and learners and we will recommend the right mix.
