

TimeCampus

TimeCampus shows teams where their hours actually went — without a start button, and without screenshots of anyone's screen.

Burnout signals

Team capacity

Privacy-first

WHAT IT IS

A privacy-first time intelligence platform that captures your day automatically, protects deep focus, and plans team capacity without surveillance.

30-SECOND PITCH

Manual timers get forgotten; monitoring tools get resented. TimeCampus captures activity from the tools people already use, assembles one categorised timeline, and gives teams aggregate capacity — no screenshots, no start button.

PROBLEM WE SOLVE

- Timers forgotten, timesheets rebuilt from memory
- Monitoring tools breed resentment, not insight
- Deep work crowded out by meetings
- Burnout spotted only after the damage

VALUE PROPOSITION

- One timeline, no start button
- Aggregate team views, no individual surveillance
- Billing-grade hours without the admin
- Overload signals early enough to act

IDEAL CUSTOMER

Distributed teams and agencies of 10-250 people who reject surveillance tooling

Not a fit: Buyers who want screenshots, keystrokes or idle policing

WHO YOU ARE TALKING TO

Agency owner — Visibility without watching your people

Engineering manager — How much deep work survived?

Freelance consultant — Bill every hour you worked

People lead — Time insight your works council accepts

TOP USE CASES

- See yesterday without a timer
- Defend deep-work blocks
- Plan capacity on aggregate reality
- Share a live client portal
- Approve timesheets before billing

CAPABILITIES

- Automatic capture
- Categorised timeline
- Focus score
- Pomodoro sessions
- Work patterns
- Team capacity planning
- Expense approvals
- Client portals
- Life balance wheel
- Consent controls

PRICING

Free	\$0
Starter	\$99/mo or \$79/mo annual
Growth	\$399/mo or \$319/mo annual
Business	\$999/mo or \$799/mo annual
Enterprise	From \$12/member/mo list, or \$9/member/mo annual at 250 or more members

Flat monthly org tiers from \$99; free tier available

COMPETITIVE LANDSCAPE

Toggl Track — No start button; focus and burnout built in

Timely — No daily approval ritual; wider capture

Rize — Not desktop-only; team planning and billing

Clockify — Automatic capture; never screenshots

WHY US

- Whole-of-life time intelligence, unique in category
- Aggregate-by-default team views, per-source consent
- Every label shows who decided it
- Flat org pricing, not per seat

PROOF & CREDIBILITY

- Role catalogue with six product-specific roles
- Privacy boundary enforced in the data model
- Published subprocessors, privacy policy and security page

DEMO

Ask us for a guided walkthrough; book the 1-1 call link

TALKING POINTS

- Insight without screenshots or keystroke logging
- Managers see rollups, never individual timelines
- Priced per organisation, not per seat
- Certifications are roadmap, not claimed today

OBJECTION HANDLING

"We already use Toggl"

Keep the timer if you like; capture fills the gaps

"Our staff will call it spying"

No screenshots; people consent per source and managers see rollups

"You have no SOC 2"

Correct — audit begins post-launch; DPA and security page available now

DISCOVERY QUESTIONS

- How do people record time today?
- What share of hours goes unbilled?
- Would your team accept screenshots?
- How many meeting hours per week?
- Who plans capacity, and on what data?

SPOT A GOOD OPPORTUNITY

- Timesheets rebuilt from memory each Friday
- Monitoring tool rejected or resented
- Billable hours leaking every month
- Meeting overload already a board topic
- Wants screenshots or keystroke evidence
- Needs payroll and invoicing built in

HOW TO INTRODUCE US

"They track time without timers and without screenshots — worth twenty minutes if timesheets are painful."

LEAD HANDOFF

Email Vignesh the company, team size, current tool and the pain

PARTNER COMMERCIALS

10-15% of first-year net subscription; up to 15% reseller margin
